	Oklahoma	51.7	48.2	55.1
	Utah	49.4	44.8	

Source: U.S. Census Bureau, 2003 American Community Survey

The table above shows the margin of error, represented by the lower and upper bounds of the 90-percent confidence interval. The confidence interval gives a range of values likely to include the population true value. The smaller the confidence interval the more precise the estimate of the characteristic of interest.

An 'N' entry in the estimate, lower bound, and upper bound columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
